Dear [REDACTED],

RE: Monash Power Precinct Project

The development of the Monash Power Precinct Project has been assessed by the Office of the Technical Regulator under section 31 of the *Hydrogen and Renewable Energy Act 2023*.

The *Hydrogen and Renewable Energy Regulations 2024* prescribe if the proposed licence will authorise exploiting a renewable energy resource through an electricity generating plant that is to be connected to the State's power system—a certificate from the Technical Regulator certifying that the electricity generation complies with the requirements of the Technical Regulator in relation to the security and stability of the State's power system.

In deciding on your application, I have taken the following information into account:

- Monash Power Precinct - Submission for OTR Generator Certificate_rB.pdf
- Your email dated 4 September 2025, regarding BESS response time

After assessing the information provided, I advise that approval is granted on the condition that 47.2MW of fast frequency response is provided via the BESS.

Should you have any questions regarding this matter, please do not hesitate to call [REDACTED] on [REDACTED]

Yours sincerely

[REDACTED]
